

PN-Series LCD Display 55"

Ultra Narrow Bezel Displays for Immersive Visual Experience

The PN-Series ultra-narrow bezel displays are designed for professional and commercial video wall applications. Given its built-in scheduler, OPS slot, and tiling function, these high-end displays are easy to set up and maintain. With its up to 500 nits of brightness, anti-reflective panel, visually stunning video walls can be displayed in demanding environments — from large public venues to 24/7 operation control rooms.

Immersive Visual Experience

55" ultra-narrow 3.5 mm bezel-to-bezel professional video wall displays create seamless images for an immersive visual experience, while the flexible landscape or portrait display orientation suits favorable content layouts and fulfills different applications.

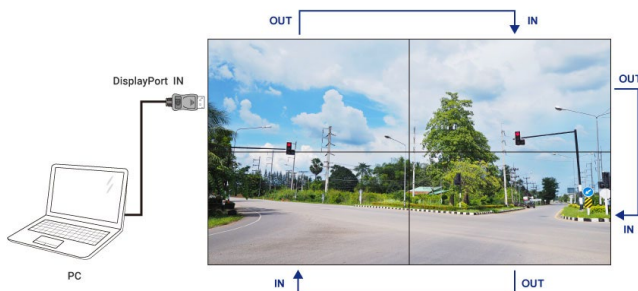

High Visibility and Low Power Consumption

Anti-glare treatment with haze 28%, high contrast, wide viewing angles and up to 500 nits brightness give images with superior clarity and visibility. EcoSmart sensor detects ambient lighting conditions to automatically adjust the brightness level and reduce power consumption.

DisplayPort Daisy-chain for 4K Video Wall Installation

With DisplayPort daisy chain functionality, the video and audio can be delivered to multiple AG Neovo's large format displays using DisplayPort cables to set up, configure and maintain 2x2 4K video wall installations with ease.

Easy Control for Multiple Displays

With IR/RS232/LAN loop-through capability, the PN-Series provides an easy and convenient single point of control for multi-display installation.

Versatile connectivity for Multimedia Playback

The PN-Series integrates diverse connectivity, including HDMI, DisplayPort, DVI, VGA and OPS slot to connect external devices. In addition, the displays support USB playback functionality and users can directly playback multimedia content via LAN connection.

Simple Content Scheduling

The built-in scheduler allows users to conveniently play content from a USB drive. Users can simply create scheduled playlists and configure playback settings with the included remote control to display personalised content.

Industry-leading Durability

Designed for 24/7 operation, these durable metal-cased displays take advantage of superior components to ensure a long product lifetime. Its integrated HeatControl Sensor automatically activates the internal cooling fans, which is crucial when the temperature rises in mission-critical installations.

Free Display Management Software

PID Command & Ctrl software allows users to control AG Neovo displays via laptop or mobile devices remotely. It provides a simple and intuitive interface for remote management, OSD-related settings, and easy control of deployed displays and video walls. The embedded UniWall™ feature allows AG Neovo displays to create up to 5x5 video walls without third-party equipment.

The software also has functions like brightness adjustment, temperature, and usage time monitoring for reliable maintenance.

Features

- Full HD 1920 x 1080 resolution
- IPS Panel technology offers high colour accuracy and wide viewing angles
- Anti-glare treatment (Haze 28%) improves visibility of the screen under ambient light
